The new **POPP HUB Powered** is not only another Z-Wave Smart Home gateway. It combines Z-Wave, WiFi and other technologies to a real connected home. Sensors, switches, thermostats, cameras and many devices more will make your home smart und intelligent. In case of a blackout you can operate your POPP HUB Powered approx. one hour by using the backup battery.

The POPP HUB Powered is a compact IP Smart Home gateway, equipped with WiFi and Z-Wave technology. This allows the complete and comfortable control of your Z-Wave network by using remote controls, wireless switches, smartphone, desktop and tablet PC as well. With its backup battery you will never lose the connectivity to your Smart Home.

The integrated firmware is Smart Home proven and supported by a big community. So, you can connect and control any certified Z-Wave device without stint. Additionally, you can integrate other communication protocols (e.g. EnOcean) into your home network USB port and connect with each other.

The HUB is able to control components by different manufacturers within one home network and allows setting direct associations between the devices. On top of that most varied

CPU: MT7620A, clock up to 580 MHz

-  Window and Blind Control

With POPP products your home will become intelligent. Control your house or apartment by tablet pc, desktop pc, smartphone or remote control. Activate the heating when you're heading home, close your windows automatically if the weather changes and receive short messages when sensors set off any alarm at home.

For its smart home products POPP trusts Z-Wave technology. Z-Wave is the international leading standard for wireless communication between intelligent devices in homes and offices and thereby the basis for successful home automation.

POPP smart home products are compatible and interoperable with Z-Wave certified devices from more than 700 manufacturers worldwide.
